US005516798A

United States Patent [19]

Ferket

[11] Patent Number: 5,516,798

[45] Date of Patent: May 14, 1996

[54] **METHOD FOR TREATING DIARRHEA AND A COMPOSITION THEREFOR**

[75] Inventor: **Peter R. Ferket**, Raleigh, N.C.

[73] Assignee: **North Carolina State University**, Raleigh, N.C.

[21] Appl. No.: **321,252**

[22] Filed: **Oct. 11, 1994**

[51] **Int. Cl.**[6] **A61K 31/685**; A61K 31/205; A61K 31/195; A61K 31/045

[52] **U.S. Cl.** **514/556**; 514/76; 514/77; 514/564; 514/727; 514/867

[58] **Field of Search** 514/76, 77, 556, 514/564, 727, 867

[57] **ABSTRACT**

Described is a method of treating diarrhea in a warm-blooded vertebrate animal, and a composition therefor. The method involves administering to the animal an effective amount of a methylamine, such as betaine. Also described is the use of a composition for the manufacture of a medicament for treatment of diarrhea in a warm-blooded vertebrate animal, wherein the composition contains an effective amount of a methylamine, such as betaine.
